# KUMBHAR KSHITIJ DINESH

**B.Tech. - Computer Engineering**

**Ph:** +91-7058157357

**Email:** kshitijkumbhar007@gmail.com

Pune, Maharashtra, India - 412105

LinkedIn: https://www.linkedin.com/in/kshitij-kumbhar-4129712a3

## BRIEF SUMMARY

Third-year Computer Engineering student at MIT AOE with a solid grounding in Data Structures & Algorithms, Object-Oriented Programming, DBMS, and Linux systems. Developing a focused interest in DevOps and cloud-native engineering, with hands-on experience in constructing CI/CD pipelines using Jenkins, containerising applications with Docker, and orchestrating deployments via Kubernetes. Gained practical exposure to automation workflows, scalable infrastructure design, and system reliability practices. Possesses a strong analytical and problem-solving approach, with an emphasis on building efficient, maintainable, and resilient systems. Currently seeking opportunities in DevOps and platform engineering to contribute towards robust, automated, and production-ready infrastructure.

## KEY EXPERTISE

DevOps | CI/CD | Jenkins | Docker | Kubernetes | Git | GitHub | Node.js | AWS | React.js | MongoDB | Spring Boot | DSA | OOP | DBMS | MySQL | Redhat Linux

## EDUCATION

**MIT Academy of Engineering, Pune** — 2023 - 2027

B.Tech. - Computer Engineering | CGPA: **8.46** / **10**

**Yashwantrao Chavan Institute of Science, Satara** — 2023

12th | Maharashtra State Board of Secondary and Higher Secondary Education | Percentage: **84.17** / **100**

**Maharaja Sayajirao Vidyalay And Jr College, Satara** — 2021

10th | Maharashtra State Board of Secondary and Higher Secondary Education | Percentage: **97** / **100**

## INTERNSHIPS

**Campus Credential** | IT / Computers - Software — 01 Jul, 2025 - 08 Aug, 2025

Full Stack Web Developer, Summer

**Key Skills:** Spring Boot | MySQL | Core Java

Designed and developed a real-time grocery ordering and delivery system with three separate portals for users, admins, and delivery partners.

User Portal: Enables customers to browse products, place orders, and track deliveries in real-time with an integrated live map. Features include secure payments, order history, and product ratings.

Admin Portal: Provides a comprehensive dashboard for managing inventory, user accounts, and delivery partner assignments. Includes analytics to monitor sales, popular products, and order statistics.

Delivery Partner Portal: A dedicated platform for delivery partners to receive new order notifications, view optimized routes, and track earnings. Facilitates in-app communication with customers and admins for a seamless delivery process.

## PROJECTS

### HostelHub – Smart Hostel Management System

02 Jan, 2026 - 06 Feb, 2026

**Mentor:** Self-Initiated Project (Independent Development) | **Team Size:** 1

**Key Skills:**

CI/CD Pipeline Design | Jenkins Pipeline Automation | Docker & Containerization | Docker Compose | AWS EC2 Deployment | GitHub Webhooks | DevOps Engineering | MERN Stack | REST API Development | Version Control (Git) | Agile Development | React.js | Node.js | MongoDB | Git & GitHub

**Project Link:** https://github.com/kshitijx07/Hostelhub

HostelHub is a production-ready, full-stack Hostel Management and Booking Platform built using the MERN stack to streamline student registration, room allocation, booking workflows, and administrative operations. The application features a modular React.js frontend with protected routes and role-based rendering, alongside RESTful APIs developed with Node.js and Express.js following MVC architecture. Secure access control is implemented using JWT-based authentication and RBAC, with optimised MongoDB schemas designed via Mongoose. The platform is fully containerised using Docker with multi-stage builds and orchestrated through Docker Compose. A Jenkins-driven CI/CD pipeline automates build, testing, Docker image creation, and AWS EC2 deployment via GitHub webhooks and Nginx reverse proxy.

### Grocito: Real-Time Grocery Ordering & Delivery System

01 Jun, 2025 - 28 Jul, 2025

**Mentor:** Mr. Krishna Singh | **Team Size:** 3

**Key Skills:** Spring Boot | MySQL | ReactJS | Core Java | Authentication

**Project Link:** https://grocito-user.vercel.app/

Designed and developed a real-time grocery ordering and delivery system with three separate portals for users, admins, and delivery partners.
User Portal: Enables customers to browse products, place orders, and track deliveries in real-time. Features include secure payments, order history, and product ratings.
Admin Portal: Provides a comprehensive dashboard for managing inventory, user accounts, and delivery partner assignments. Includes analytics to monitor sales, popular products, and order statistics.
Delivery Partner Portal: A dedicated platform for delivery partners to receive new order notifications and track earnings. Facilitates in-app communication with customers and admins for a seamless delivery process.

### MECH-IT_ESAY

**Team Size:** 3

**Key Skills:** Web Development | FrontPage

**Project Link:** https://mechiteasy.vercel.app/

MechItEasy: MechitEasy is a platform simplifying mechanical engineering concepts and resources through interactive tools, tutorials, and problem
solving aids.
Features: Dynamic content rendering, responsive design for accessibility, and smooth user interactions powered by pure HTML, CSS, and Vanilla
JavaScript.

## ASSESSMENTS / CERTIFICATIONS

### Industrial Internship in Full Stack Development

**Key Skills:**

Full Stack Development | Java 17 | Spring Boot 3 | React 18 | Tailwind CSS | MySQL 8 | JWT Authentication | Spring Security

Completed a 2-month Industrial Internship in Full Stack Development from 20th June 2025 to 10th August 2025.
Designed and developed "Grocito – Real-Time Grocery Ordering & Delivery System", a production-ready full-stack web platform enabling customers to order groceries with real-time tracking and location-based inventory management.
Developed backend REST APIs using Java 17 and Spring Boot 3 with JWT-based authentication and role-based access control for Customers, Administrators, and Delivery Partners.
Implemented frontend applications using React 18 and Tailwind CSS for three independent user roles.
Integrated MySQL 8 database with optimized schema design, order lifecycle management, cart operations, and delivery tracking modules.
Applied industry-standard practices including secure authentication, modular architecture, RESTful API design, and deployment-ready configurations.
